Front-end software engineer with an intense background in arts, dance, and fitness. Possess a passion for working in a team while utilizing sophisticated communication skills from prior experience leading fitness and dance classes. Combines new web development skills with grit gained from working as a freelance dancer. Confident to bring an energetic, team perspective to the Seattle development culture.

### Technical Skills

Development: HTML, CSS, Bootstrap, JavaScript, jQuery, API, Node, MySQL, Mongo, ReactJS, Git, Visual Studio Code

Other: Adobe Photoshop, Adobe Lightroom, Microsoft Office, GarageBand, photography

### Projects

#### Local concert and restaurant/bar finder

<https://buley004.github.io/ballads-and-brews/>

- *Ballads and Brews* | <https://github.com/buley004/ballads-and-brews>
- User searches for a local concert of their musical liking happening that day which then populates restaurants and bars within a close radius of the venue all within one application; no need for multiple search engines
- Languages used: HTML, CSS, JavaScript, jQuery, API documentation
- Core responsibilities:
  - utilized Eventbrite and Zomato API's to find shows and locate food/drinks close to the venue and printed results on page in stylized manner
  - UI/UX design implementation

#### Household bill splitting application

<https://divvy-application.herokuapp.com/>

- *Divvy* | <https://github.com/jottobot/Divvy>
- Each unique user can add a bill, bill details, and payers of that bill to their account
- Each user's account shows bills they specifically owe making tracking bills easier without distraction of communication found in other apps
- Languages used: HTML, CSS, JavaScript, jQuery, API documentation, Node.js, MySQL, Express
- Core responsibilities:
  - UI/UX design and implementation with HTML, CSS and Bootstrap, including mobile responsive
  - seamless communication with back-end team ensuring all parts of app run smoothly

### Experience

#### Freelance front-end engineer
